PROFESSIONAL SUMMARY

Software Engineer developing core retail banking modules in C, Pro*C and SQL for Eurobank Cyprus through LTM. Background in Information and Electronic Systems Engineering, with hands-on experience in web development, IT automation, infrastructure and product ownership. Builds internal tools that remove repetitive work and turns requirements into shipped releases.

EXPERIENCE

Software Engineer
Aug 2026 - Present

LTM | Limassol, Cyprus | Client: Eurobank Cyprus, core retail banking system

- Develop and maintain retail banking modules in C and Pro*C
- Write and optimise SQL queries for high-volume database processing
- Work with business and QA teams on requirement analysis, testing and release delivery

Junior IT Support Specialist
Mar 2026 - Jul 2026

PHC Franchised Restaurants Public Ltd | Nicosia, Cyprus

- Built internal tools and automation (PowerShell, Python, Active Directory), including a network scanner with AD integration, SNMP switch detection and Excel reporting
- Developed internal systems and microservices; owned business applications used across restaurant locations
- Administered POS systems network-wide, including menu and price updates
- Maintained networks, servers and workstations; first- and second-line support; backup monitoring
- Handled vendor and procurement communication for IT hardware and services

Lead Product Owner
Sep 2025 - Jul 2026

Pokerload | Nicosia, Cyprus

- Owned roadmap and delivery for a poker floor management (CRM) web platform, iOS/Android apps and an online poker platform
- Defined requirements, prioritised the backlog and coordinated web, mobile and backend development
- Integrated CRM, analytics and reporting features for real-time operational monitoring
- Ran testing, debugging and release cycles across all Pokerload applications

Product Designer (UI/UX)
May 2025 - Oct 2025

Pokerload | Nicosia, Cyprus

- Designed screens, components and user flows in Figma for the CRM platform and mobile app
- Contributed front-end implementation and iterated on stakeholder feedback

EXPERIENCE (CONTINUED)

Student Researcher — Jan 2024 - Feb 2026

International Hellenic University | Greece | HomAlert IoT project (IDAC team)

- Built the central web platform (HTML, CSS, JavaScript, Bootstrap) with secure authentication and a real-time alert dashboard
- Integrated smoke, gas, water and humidity sensor data from a NodeMCU microcontroller into the web layer

Data Analyst — Aug 2024

Meggitt | Nicosia, Cyprus

- Analysed photovoltaic park performance data to identify efficiency gains

Intern — Jul 2024 - Aug 2024

K Energy by Karantonis | Nicosia, Cyprus | RIF Internship Programme

- Monitored and analysed PV park performance; evaluated SCADA protocols and system software to increase output
- Performed on-site measurements and resolved hardware and software issues

SKILLS

Languages	C, Pro*C, C++, SQL, PL/SQL, Python, C#, PHP, JavaScript, HTML, CSS
Frameworks	ASP.NET Core, Bootstrap
Databases	Oracle (Pro*C), SQL Server, MySQL, query optimisation
Systems	Windows Server, IIS, Active Directory, PowerShell, Git, SNMP
Embedded / IoT	NodeMCU, sensor integration
Product	Requirements analysis, backlog management, Figma, UI/UX, QA and release cycles

PROJECTS

Network Scanner (Python): scans the network, cross-references Active Directory, detects switches via SNMP and exports an Excel inventory

Windows Admin Utilities (C, PowerShell): time sync, auto-login and print-spooler control tools for Windows Server

Personal Portfolio: chrysovalantistsiartas.github.io/Personal-Portfolio

EDUCATION

BSc Information and Electronic Systems Engineering — 2021 - 2026

International Hellenic University, Greece

Thesis: A Systematic Study of Business Models for the 5G and 6G Communications Ecosystem

CERTIFICATIONS & LANGUAGES

Certifications	Figma UI/UX Design Essentials, IT Fundamentals, Digital Skills Standard
Languages	Greek (native), English (full professional), French (elementary)
